

Everything in One *Integrated* Plan

Two documents, one purpose: making Essentia the most visible, most knowledgeable, and most recommended design firm in India — in AI search, press, social, and the minds of architects, developers, and luxury buyers. This is the complete plan, from the first week to the end of Year 1.

TRACK A — THE ACTION DASHBOARD

What To Do and When

Every corrective action, technical fix, personal brand task, AI visibility improvement, and content initiative — with checkboxes, owners, and urgency. This is the execution track. It answers: what do we do today?

TRACK B — THE MASTERY PROGRAMME

How To Build the Team That Does It

The phased skill-building programme that takes the team from task-completers to category experts. Learning resources, measurable milestones, and the institutional knowledge that makes Essentia's marketing compound over time.

MONTHS TO MASTERY

The Core Problem

When someone asks ChatGPT, Perplexity, or Google Gemini — *"best luxury interior design firm in Delhi"* — AI doesn't search Google in real time. It pulls from **what it has already learned** about authoritative, consistently cited sources. EE and EH have strong work but **weak AI-readable signals**. Hardesh and Monica are known. **Hridik is largely invisible to machines**. The team has the knowledge — but not yet the systems to make that knowledge findable. This plan closes both gaps simultaneously.

TRACK A ANSWER

7 action areas, all with checkboxes. Start with the urgent technical fixes in Week 1 — they are silent, permanent, and require no ongoing effort once deployed.

TRACK B CONNECTION

Phase 1 of the Mastery Programme (below) equips the team to understand why each fix matters — so they can maintain and build on it, not just implement it once.

Website Fixes — EE & EH

One-time infrastructure changes with permanent AI visibility returns. These should all be live by the end of Week 2.

ACTIONS BELOW

Schema markup, meta descriptions, founder bio pages, llms.txt, robots.txt, FAQ content. Web team owns all of these.

PHASE 1 CONNECTION

Phase 1, Week 2 of the Mastery Programme has the team implementing schema markup together and understanding what it tells AI systems about Essentia.

ESSENTIAENVIRONMENTS.COM

WEB TEAM

☐

Add JSON-LD Schema Markup — Organization + Person + Service

Add structured data to the homepage: Organization schema (name, founders, founding year, location, services), Person schema for Hardesh and Monica, and Service schema for each offering. This is how AI crawlers learn who you are with authority.

URGENT · WEEK 1

☐

Rewrite Homepage Meta Description — 155 Characters, Insight-Led

Replace the current generic description. New version must mention: Hardesh Chawla, design-to-build, Gurgaon, 1000+ projects, full-service. Every word is a searchable signal.

URGENT · WEEK 1

☐

Create Founder Bio Pages — /hardesh-chawla + /monica-chawla

AI models need a clear person → company link. Each page: full philosophy (not just bio), their design thinking in their own voice, press quotes, awards, and social links. This is how AI learns to associate their names with Essentia when someone searches for either.

WEEK 1-2

☐

Deploy llms.txt — Essentia Environments' AI Identity Brief

A new standard file that tells AI models who you are, what you do, and which content is most authoritative. Think of it as a business card written for machines. Deploy at [essentiaenvironments.com/llms.txt](#).

WEEK 2

☐

Update robots.txt — Explicitly Allow All AI Crawlers

Confirm GPTBot, PerplexityBot, ClaudeBot, Google-Extended, and Bingbot are all permitted. Block only admin and checkout pages. This is a 5-minute fix that may be silently blocking AI discovery.

WEEK 2

☐

Add FAQ Content — Structured to Answer AI Queries Directly

Google AI Overviews and Perplexity pull from FAQ-structured content. Add sections answering: "What is a design-to-build firm?", "Who are the best interior designers in Gurgaon?", "What does Essentia Environments do differently?" Each answer must also teach the reader something they didn't know.

MONTH 1

☐

Launch Editorial Blog — Hardesh's Authentic Voice, 2 Articles/Month

Replace generic content with Hardesh's actual thinking: "Why I refuse to follow trends", "Space planning is the skeleton", "The 5 questions every homeowner should ask before choosing an interior designer." Each piece must teach the reader one specific thing they can carry away.

MONTH 1
